Project title
(English)**Fostering Interprofessional Collaboration between Nurses and Physicians
to Improve Patient Outcome****Date****June 5, 2013**

Objective of this study is to provide information and knowledge, which can support and guide the development and optimization of interprofessional teamwork between health professionals in the course of care delivery. Based on an innovative, work psychology-based model of coordination, coordination and collaboration, this project achieves a detailed and systematic description of challenges and requirements of the interprofessional relationship with regards to inpatient treatment. Based on the findings, solutions will be developed, which enable clinic management and professionals to optimize the quality of interprofessional teamwork and patient-centred care.
